Project Overview

Every students has been assigned to program a project. Theme that were given by lecturer is FIFA World Cup. Hence, it has been decided among groupmates to create a project called Player Scouting System.

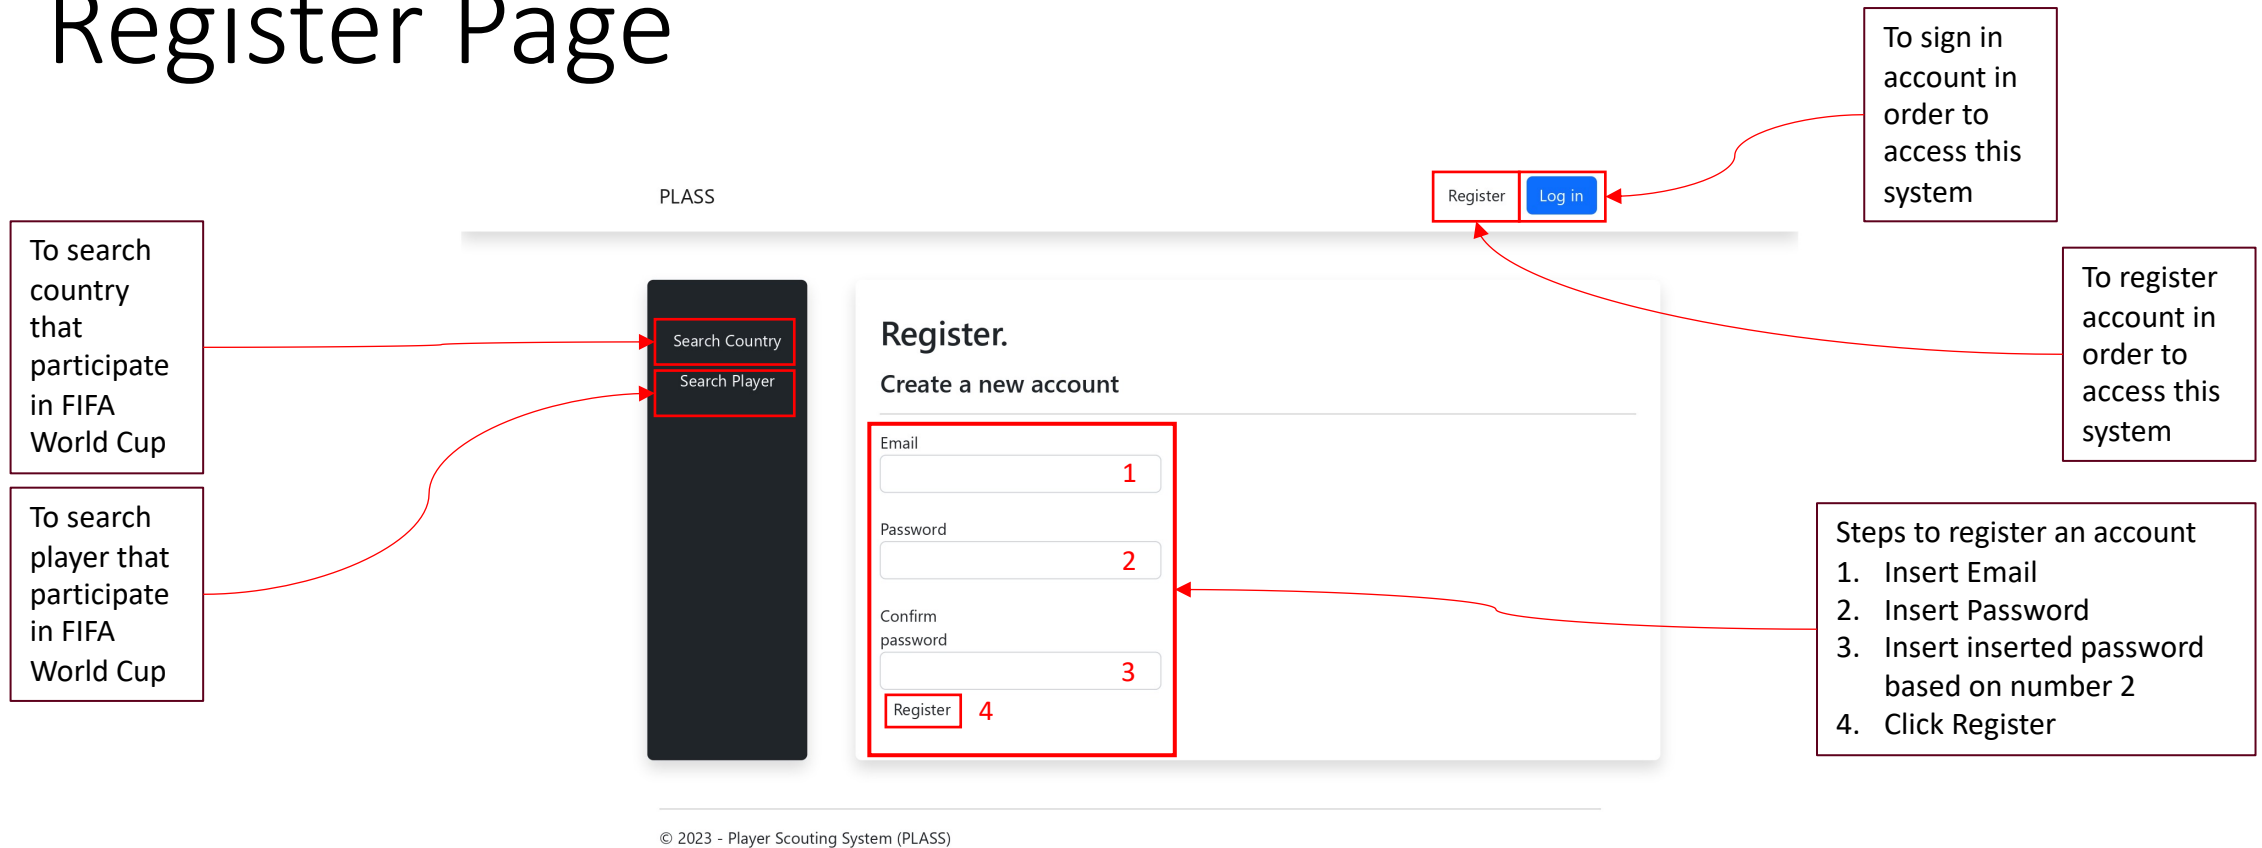

The purpose of this system is to manage list of player's data including their personal information details, country that they playing for. This system also manage player and match creation where the person in charge can manage all information throughout the tournament.

User Manual

As we acknowledge, user is the main reason why this project is being develop. Not all user know how to use system. Hence, we built this system in a user friendly ways for them to use.

The purpose of this user manual is to help them understand more on how to use this system wisely. In this section, we will be providing steps on how to use the system along with functionality that existed in each module.
